

Building face detection app

DASHBOARDS

1)AWS Login screen with username

2)EC2 Dashboard

The screenshot displays the AWS EC2 Management Console. At the top, a blue banner welcomes users to the new EC2 console, mentioning a redesign for better performance and a toggle to switch between the old and new versions. Below this, the 'Resources' section shows a summary of EC2 resources in the US East (Ohio) Region. A table lists various resource types and their counts: Running instances (0), Elastic IPs (0), Dedicated Hosts (0), Snapshots (0), Volumes (0), Load balancers (0), Key pairs (2), Security groups (3), and Placement groups (0). A 'Launch instance' button is visible at the bottom left of the resources section. To the right, the 'Account attributes' section shows supported platforms (VPC) and the default VPC (vpc-9502d7fe). Below that, the 'Additional information' section provides links to the getting started guide, documentation, all EC2 resources, forums, pricing, and contact us. The left sidebar contains navigation links for EC2 Dashboard, Events, Tags, Reports, Limits, INSTANCES (Instances, Instance Types, Launch Templates, Spot Requests, Savings Plans, Reserved Instances, Dedicated Hosts, Capacity Reservations), IMAGES (AMIs, Bundle Tasks), and ELASTIC BLOCK STORE (Volumes). The bottom of the screen shows the Windows taskbar with the search bar and various application icons, along with the system clock indicating 19:52 on 01-04-2020.

Welcome to the new EC2 console!

We're redesigning the EC2 console to make it easier to use and improve performance. We'll release new screens periodically. We encourage you to try them and let us know where we can make improvements. To switch between the old console and the new console, use the New EC2 Experience toggle.

EC2

Resources

You are using the following Amazon EC2 resources in the US East (Ohio) Region:

Running instances	0	Elastic IPs	0
Dedicated Hosts	0	Snapshots	0
Volumes	0	Load balancers	0
Key pairs	2	Security groups	3
Placement groups	0

3) S3 Dashboard

The screenshot shows the Amazon S3 Management Console in a web browser. The top navigation bar includes the AWS logo, 'Services', 'Resource Groups', and user information 'AKSHAY HIREMATH'. A blue notification banner at the top states: 'We're gradually updating the design of the Amazon S3 console. You will notice some updated screens as we improve the performance and user interface. To help us improve the experience, [give feedback](#) on the recent updates.'

The left sidebar contains the 'Amazon S3' section with links to 'Buckets', 'Batch operations', 'Access analyzer for S3', 'Block public access (account settings)', and 'Feature spotlight'. The main content area is titled 'Amazon S3' and displays 'Buckets (1)'. It includes a search bar 'Find bucket by name', a table of buckets, and buttons for 'Copy ARN', 'Empty', 'Delete', and 'Create bucket'.

Name	Region	Access	Bucket created
ak9731	US East (Ohio) us-east-2		2020-03-31T04:13:15.000Z

The bottom of the screenshot shows the Windows taskbar with the search bar and various application icons. The system tray on the right indicates the date and time as 19:54 on 01-04-2020.

4) Rekognition Dashboard

The screenshot displays the Amazon Rekognition console. The top navigation bar is identical to the S3 dashboard, showing 'Services', 'Resource Groups', and user information. The left sidebar lists 'Amazon Rekognition' services: 'Custom Labels', 'Use Custom Labels', 'Demos', 'Object and scene detection', 'Image moderation', 'Facial analysis', 'Celebrity recognition', 'Face comparison', 'Text in image', 'Video Demos', 'Video analysis', 'Metrics', and 'Additional Resources' (including 'Getting started guide' and 'Download SDKs').

The main content area features a large hero section with the title 'Amazon Rekognition' and the subtitle 'Deep learning-based visual analysis service'. It includes the text 'Search, verify, and organize millions of images and videos' and buttons for 'Try Demo' and 'Download SDKs'. Below this, three columns highlight key features:

- Easily Integrate Powerful Visual Analysis into Your App**: You don't need computer vision or deep learning expertise to take advantage of Rekognition's high quality image and video analysis for your web, mobile, enterprise or device applications. Amazon Rekognition removes the complexity of building visual recognition capabilities by making powerful
- Continuously Learning**: Amazon Rekognition is designed to use deep learning technology to analyze billions of images and videos daily. It is continuously learning as we add support for new capabilities and learn from more and more data.
- Integrated with AWS Services**: Amazon Rekognition is designed to work seamlessly with other AWS services. Rekognition integrates directly with Amazon S3 and AWS Lambda so you can build scalable, affordable, and reliable visual analysis applications. You can start analyzing images and videos stored in Amazon S3 without moving any data. You can also run real-time

The bottom of the screenshot shows the Windows taskbar and system tray, with the date and time as 19:55 on 01-04-2020.

EC2

1) Choosing an AMI

Launch instance wizard | EC2 M... x

us-east-2.console.aws.amazon.com/ec2/v2/home?region=us-east-2#LaunchInstanceWizard:

Services Resource Groups AKSHAY HIREMATH Ohio Support

1. Choose AMI 2. Choose Instance Type 3. Configure Instance 4. Add Storage 5. Add Tags 6. Configure Security Group 7. Review

Step 1: Choose an Amazon Machine Image (AMI)

An AMI is a template that contains the software configuration (operating system, application server, and applications) required to launch your instance. You can select an AMI provided by AWS, our user community, or the AWS Marketplace; or you can select one of your own AMIs.

Search for an AMI by entering a search term e.g. "Windows"

Quick Start

My AMIs AWS Marketplace Community AMIs

Free tier only

Amazon Linux 2 AMI (HVM), SSD Volume Type - ami-0e01ce4ee18447327 (64-bit x86) / ami-03201f374ab66a26e (64-bit Arm)

Amazon Linux 2 comes with five years support. It provides Linux kernel 4.14 tuned for optimal performance on Amazon EC2, systemd 219, GCC 7.3, Glibc 2.26, Binutils 2.29.1, and the latest software packages through extras.

Root device type: ebs Virtualization type: hvm ENA Enabled: Yes

64-bit (x86) 64-bit (Arm)

Amazon Linux AMI 2018.03.0 (HVM), SSD Volume Type - ami-01b01bbd08f24c7a8

The Amazon Linux AMI is an EBS-backed, AWS-supported image. The default image includes AWS command line tools, Python, Ruby, Perl, and Java. The repositories include Docker, PHP, MySQL, PostgreSQL, and other packages.

Root device type: ebs Virtualization type: hvm ENA Enabled: Yes

64-bit (x86)

Red Hat Enterprise Linux 8 (HVM), SSD Volume Type - ami-0520e698dd500b1d1 (64-bit x86) / ami-0099847d600887c9f (64-bit Arm)

Red Hat Enterprise Linux version 8 (HVM), EBS General Purpose (SSD) Volume Type

Root device type: ebs Virtualization type: hvm ENA Enabled: Yes

64-bit (x86) 64-bit (Arm)

SIUE Linux Enterprise Server 15 SP4 (HVM), SSD Volume Type - ami-04e5eb51ee148025 (64-bit x86) / ami-02a73009018018174 (64-bit Arm)

2) Choosing an instance Type

Launch instance wizard | EC2 M... x

us-east-2.console.aws.amazon.com/ec2/v2/home?region=us-east-2#LaunchInstanceWizard:

Services Resource Groups AKSHAY HIREMATH Ohio Support

1. Choose AMI 2. Choose Instance Type 3. Configure Instance 4. Add Storage 5. Add Tags 6. Configure Security Group 7. Review

Step 2: Choose an Instance Type

Amazon EC2 provides a wide selection of instance types optimized to fit different use cases. Instances are virtual servers that can run applications. They have varying combinations of CPU, memory, storage, and networking capacity, and give you the flexibility to choose the appropriate mix of resources for your applications. Learn more about instance types and how they can meet your computing needs.

Filter by: All instance types Current generation Show/Hide Columns

Currently selected: t2.micro (Variable ECUs, 1 vCPUs, 2.5 GHz, Intel Xeon Family, 1 GiB memory, EBS only)

	Family	Type	vCPUs	Memory (GiB)	Instance Storage (GB)	EBS-Optimized Available	Network Performance	IPv6 Support
<input type="checkbox"/>	General purpose	t2.nano	1	0.5	EBS only	-	Low to Moderate	Yes
<input checked="" type="checkbox"/>	General purpose	t2.micro	1	1	EBS only	-	Low to Moderate	Yes
<input type="checkbox"/>	General purpose	t2.small	1	2	EBS only	-	Low to Moderate	Yes

3)Adding Storage

The screenshot shows the AWS Launch Instance Wizard at Step 4: Add Storage. The breadcrumb trail indicates the steps: 1. Choose AMI, 2. Choose Instance Type, 3. Configure Instance, 4. Add Storage (current), 5. Add Tags, 6. Configure Security Group, and 7. Review. The main heading is "Step 4: Add Storage". Below it, a paragraph explains that the instance will be launched with specific storage settings and that additional EBS volumes can be attached after launch. A table lists the storage configuration for the root volume:

Volume Type	Device	Snapshot	Size (GiB)	Volume Type	IOPS	Throughput (MB/s)	Delete on Termination	Encryption
Root	/dev/xvda	snap-0f54692056aaa4c20	8	General Purpose SSD (gp2)	100 / 3000	N/A	<input checked="" type="checkbox"/>	Not Encrypted

Below the table is an "Add New Volume" button. A blue box contains a note: "Free tier eligible customers can get up to 30 GB of EBS General Purpose (SSD) or Magnetic storage. Learn more about free usage tier eligibility and usage restrictions." At the bottom right, there are buttons for "Cancel", "Previous", "Review and Launch", and "Next: Add Tags". The footer shows the AWS logo, "Services", "Resource Groups", and user information: AKSHAY HIREMATH, Ohio, Support.

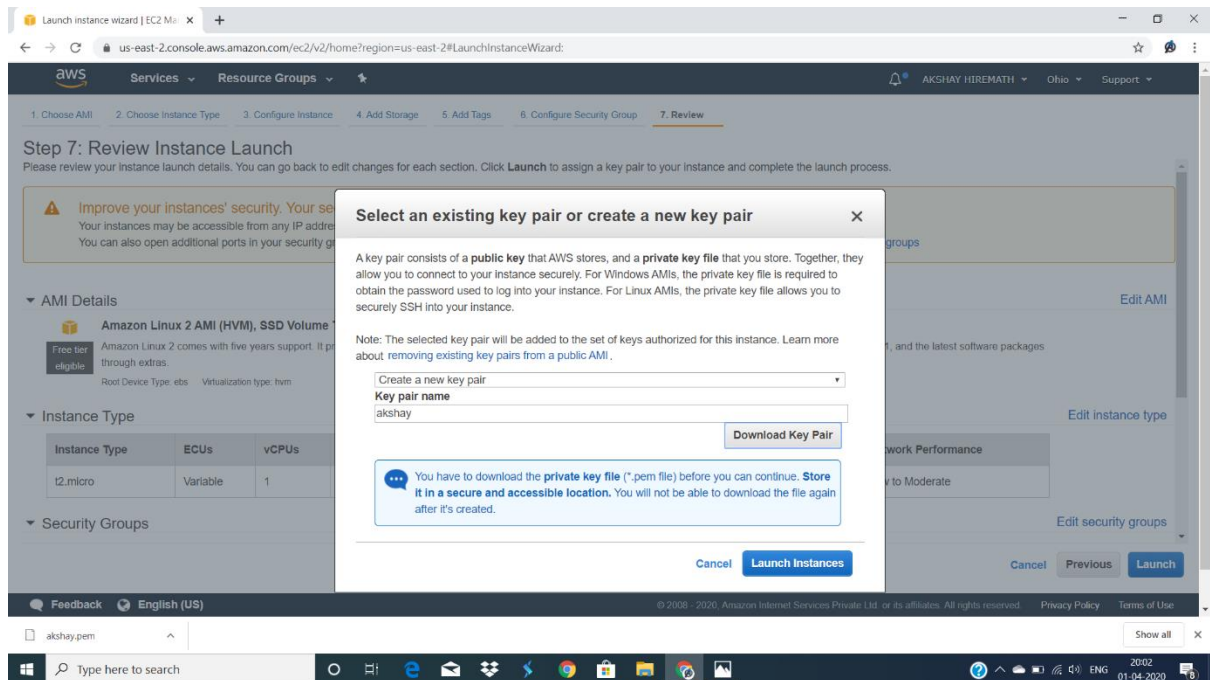

4)Configuring Security Group

The screenshot shows the AWS Launch Instance Wizard at Step 6: Configure Security Group. The breadcrumb trail indicates the steps: 1. Choose AMI, 2. Choose Instance Type, 3. Configure Instance, 4. Add Storage, 5. Add Tags, 6. Configure Security Group (current), and 7. Review. The main heading is "Step 6: Configure Security Group". Below it, a paragraph explains that a security group is a set of firewall rules that control traffic. It states that users can add rules to allow specific traffic, such as HTTP and HTTPS, or create a new security group or select from an existing one. A section titled "Assign a security group:" has two radio buttons: "Create a new security group" (selected) and "Select an existing security group". Below this, there are input fields for "Security group name:" (launch-wizard-3) and "Description:" (launch-wizard-3 created 2020-04-01T20:01:03.528+05:30). A table lists the security group rules:

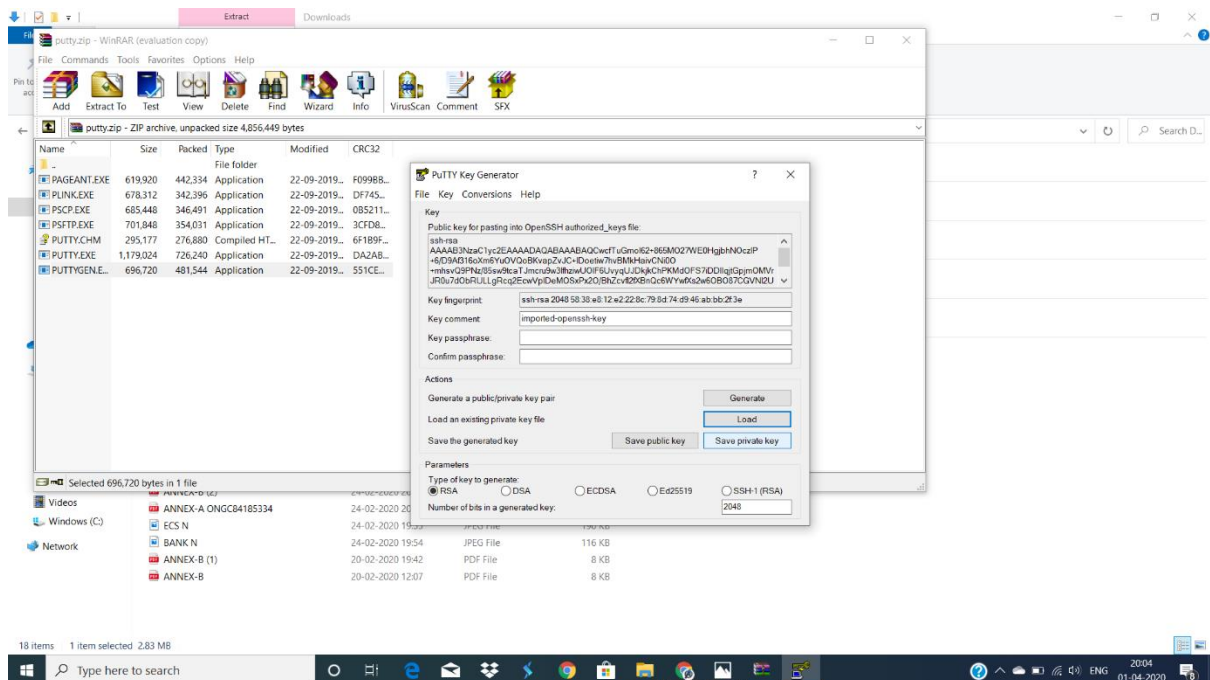

Type	Protocol	Port Range	Source	Description
SSH	TCP	22	Custom 0.0.0.0/0	e.g. SSH for Admin Desktop

Below the table is an "Add Rule" button. A yellow box contains a warning: "Warning Rules with source of 0.0.0.0/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only." At the bottom right, there are buttons for "Cancel", "Previous", and "Review and Launch". The footer shows the AWS logo, "Services", "Resource Groups", and user information: AKSHAY HIREMATH, Ohio, Support.

3)Celebrity Recognition

The screenshot displays the AWS Rekognition Console interface for the Celebrity Recognition demo. The browser address bar shows the URL: `us-east-2.console.aws.amazon.com/rekognition/home?region=us-east-2#/celebrity-detection`. The AWS logo and navigation tabs (Services, Resource Groups) are visible at the top. The left sidebar lists various Rekognition services, with 'Celebrity recognition' highlighted. The main content area features a large image of Virat Kohli with a bounding box around his face. Below this, there are options to 'Choose a sample image' (showing thumbnails of Amazon founders) or 'Use your own image' (with an 'Upload' button and a text field for 'Use image URL'). The right panel, titled 'Results', shows a 'Done with the demo?' link, a 'Results' section with a thumbnail of Virat Kohli and his name, and a 'Match confidence' of 100%. Below this are sections for 'Request' and 'Response'. The footer includes a feedback link, language selection (English (US)), copyright information (© 2008 - 2020), and links to Privacy Policy and Terms of Use.

4)Text in Image

The screenshot displays the AWS Rekognition Console interface for the Text in Image demo. The browser address bar shows the URL: `us-east-2.console.aws.amazon.com/rekognition/home?region=us-east-2#/text-detection`. The AWS logo and navigation tabs (Services, Resource Groups) are visible at the top. The left sidebar lists various Rekognition services, with 'Text in image' highlighted. The main content area features a large image of a coffee cup with text overlays: 'IT'S MONDAY but keep Smiling'. Below this, there are options to 'Choose a sample image' (showing thumbnails of a coffee cup and a car) or 'Use your own image' (with an 'Upload' button and a text field for 'Use image URL'). The right panel, titled 'Results', shows a 'Done with the demo?' link, a 'Results' section with a list of detected text segments: 'IT'S', 'MONDAY', 'but keep', and 'Smiling', and a 'Match confidence' of 100%. Below this are sections for 'Request' and 'Response'. The footer includes a feedback link, language selection (English (US)), copyright information (© 2008 - 2020), and links to Privacy Policy and Terms of Use.
